

Skyward Integration

Skyward Integration

August 2, 2022

SameGoal integrates with most student information systems, allowing the two systems to pass student information back and forth. We are happy to announce that we have a new streamlined integration setup with Skyward SMS 2.0. This streamlined integration will allow districts that use Skyward as a SIS to add nightly demographic information, as well as set up alerts in Skyward to view documents authored in SameGoal.

To enable the Skyward integration visit the [Skyward integration technical guide](#).

This new integration is available for any district that uses Skyward SMS 2.0.
