

Planning Call

Step 1 of implementation is to help you make a plan. On your planning call, we'll discuss:

- Each implementation step and what's required
- Identify district stakeholders best suited to help complete each step
- Set key dates or timelines required for a successful implementation

A Special Programs director, secretary and other key staff, including technical, may be helpful to have on this call. For most small to mid-size districts, this call generally takes an hour or less.

After the call, your representative will send a summary email, create your district account and initiate next steps.
